**How To Measure For Your Shower Base**

**Step #1: Measure Stud-to-Stud:** Measure the opening of the shower base area between the stud walls.

**Step #2: Measure For Drain:** Measure the distance from 2 perpendicular stud walls to the "center of drain".

**Step #3: Adjust Measurements:** Reduce "stud-to-stud" measurements by 1/2". Reduce "center of-drain" measurements by 1/4". (This will allow for a 1/4" between the stud walls and the outside perimeter of the shower base so that the shower base can be "slightly" re-positioned if necessary).

**Step #4: Enter your dimensions on the appropriate dimension form (attached).**
