Acrylic Shower Base

(Available in **White** or **Bisque**)

How To Use This Price List

This price list can be used for "budgeting" purposes only due to it's inability to calculate shipping costs.

Shipping cost will vary due to shipping location, size of shower base, and other related shipping parameters.

Step #1: Calculate the square inches of your **"*BASIN"** (sloped) Area. **Enter Here:** _____

Step #2: Calculate the total length of your **"*CURB"** in linear inches. **Enter Here:** _____

Step #3: Locate your "BASIN" **size range** for the "BASIN" price.

Step #4: Multiply the total linear inches of your "CURB" by the "CURB" price.

Step #5: Add the price of the "BASIN" and the price of the "CURB" to get your total cost (less shipping).

Sample: 36 X 48 Tile Basin w/ a 48" curb. "BASIN" (1728 sq. inches) \$602 + "CURB" (48") \$192 = \$794 (less shipping)

*The **"BASIN"** area is the sloped area of a shower base (see diagram).

*The **"CURB"** is sometimes referred to as the threshold. Our curbs are 4" X 4" X your specified length (see diagram).

NOTE: A **"CURB"** can be attached to any, or multiple sides of a Tile-Basin shower base.

Square Inches	Size Ranges	Basin Pricing
Length X Width	Up to 1400 sq. Inches	\$ 520.00
Length X Width	1401 to 1700 sq. Inches	\$ 543.00
